Art Unit: 2821

DETAILED ACTION

Drawings

1. Figure 8 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 3. Claims 1, 3, 7, 9, 11, and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Fukasawa et al (US Patent 5,966,097).

Fukasawa et al disclose, in figure 5, an antenna device for a portable radio unit comprising a ground plate 1, a first power feed element 2, a first parasitic element 3, a

Application/Control Number: 10/524,582 Page 3

Art Unit: 2821

short circuit part 3a electrically connected the parasitic element and the ground plane, a power feed part 2a electrically connected with the power feed element, wherein the power feed element and the parasitic element are parallel, meander shape, and electro magnetic coupled together.

4. Claims 1, 3, 4, 9, 11, and 12 are rejected under 35 U.S.C. 102(e) as being anticipated by Ying et al (US Patent 6,650,294).

Ying et al disclose, in figure 4, an antenna device for mobile wireless communication devices comprising a substrate 405 which includes a conductive plate functioned as a ground plane, column 7, lines 11-13, a first power feed element 420, a first parasitic element 410, a short circuit part 415 electrically connected the parasitic element and the ground plane, a power feed part 425 electrically connected with the power element, a second power feed element, not shown in number, which is branched from the first power feed element, and a second parasitic element 410A branched from the first parasitic element, wherein the first power feed element and the first parasitic element are parallel.

5. Claims 1- 3, 5, 6, 9, 11, 13, and 14 are rejected under 35 U.S.C. 102(e) as being anticipated by Kane et al (US Patent 6,859,174).

Kane et al disclose, in figure 2, an antenna device for a communication device comprising a ground plate 15, a first power feed element 11, a first parasitic element 12, a short circuit part 14 electrically connected the parasitic element and the ground plane, a power feed part 16 electrically connected with the power feed element, wherein the

first power feed element the first parasitic element are spiral shape or helical shape, see column 8, lines 55-60.

Allowable Subject Matter

6. Claims 8 and 16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

7. The patents to Ollikainen et al, Takei, and Burrell et al are cited as of interest showing the antenna similar to that disclosed.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tan Ho whose telephone number is (571) 272-1822. The examiner can normally be reached on M-F (8:00AM - 5:00PM).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Don Wong can be reached on (571) 272-1834. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
